

ABSTRACT

A collapsible support frame having two side members attached to each other by at least one hinge and a retention ring which when placed on the side members secures a bag to the support frame in an open position. The two side members pivot with respect to each other to a preferred angle and the retention ring holds the side members together at the preferred angle. The support frame can be placed either upright or laid on the ground allowing the user to insert items in the bag in an easy fashion.
